

Awais Mumtaz

Lahore, Punjab, Pakistan | awaismumtaz1406@gmail.com | +92 328 4215580 | linkedin.com/in/awaismumtaz1406 | awaismumtaz1406.github.io

SUMMARY

Software Engineering student skilled in Python, C++, JavaScript, SQL, and REST APIs, with hands-on experience in front-end development, database systems, and full-stack AI-powered applications. Solved 100+ LeetCode problems with strong problem-solving and software development skills. Seeking an internship as a Software Engineer.

EXPERIENCE

Front End Developer — Fly Rank *June 2026 – July 2026, Remote*

- Developed and optimized responsive web interfaces to resolve layout inconsistencies and ensure a seamless experience across all devices.
- Built clean, reusable UI components to streamline site navigation and improve overall page rendering speeds.

Front End Developer — Arch Technologies *April 2026 – May 2026, Remote*

- Developed front-end features for internal web applications using HTML5, CSS3, and JavaScript.
- Prepared technical documentation and user guides to support project handover and maintenance.

PROJECTS

StudySync AI — Autonomous Academic Copilot & ReAct Reasoning Engine

GitHub: github.com/awaismumtaz1406/StudySync-Ai | Live: study-sync-ai-je9e.vercel.app/

- Built an autonomous bilingual (Roman Urdu/English) academic copilot combining a ReAct reasoning agent with Retrieval-Augmented Generation for university students.
- Engineered course-scoped lecture slide search using Supabase pgvector with 768-dimensional embeddings and HNSW indexing for fast, scoped retrieval.
- Implemented relative-time parsing (e.g. "kal", "parso") to auto-schedule academic tasks and dispatch automated WhatsApp and Email alerts.
- Stack: React, Node.js, Express, Supabase (PostgreSQL + pgvector), Google Gemini API.

SalesMatrix Studio — Sales Intelligence & Financial Analytics Platform

GitHub: github.com/awaismumtaz1406/SalesMatrix | Live: sales-matrix-d6vfs6wuo-awais-mumtaz.vercel.app/

- Developed an enterprise-grade BI dashboard transforming raw transaction datasets into executive P&L statements, dynamic pivot tables, and 9 multi-dimensional analytical views.
- Integrated Google Gemini as an AI executive analyst to generate natural-language strategic briefings and margin-risk recommendations from live sales data.
- Built an RFC-4180 compliant CSV ingestion engine with automatic schema detection, plus Supabase-backed cloud persistence secured with Row Level Security.
- Stack: React 19, TypeScript, Tailwind CSS, Recharts, Node.js/Express, Supabase, Google Gemini API.

Customer Churn Prediction System

GitHub: github.com/awaismumtaz1406/customer-churn-prediction-System.git

- Built an end-to-end ML pipeline using a telecom dataset of 7,043 customers to predict churn.
- Performed preprocessing including missing value handling, encoding, and feature normalization.
- Trained Logistic Regression and KNN models evaluated via Accuracy, Precision, Recall, F1-Score, and Confusion Matrix.
- Achieved nearly 80% accuracy and identified churn indicators including tenure, contract type, and monthly charges.

Fitness Coaching Application

GitHub: github.com/awaismumtaz1406/fitness-app.git

- Developed a full-stack desktop fitness application using Python, Tkinter, and MySQL.
- Implemented SHA-256 password hashing, secure authentication, CRUD operations, and persistent storage.
- Designed database schema and built features for workout tracking, calorie monitoring, and diet recommendations.

EDUCATION

Bachelor of Science in Software Engineering *University of Management and Technology • Lahore, Pakistan • 2027*

- CGPA: 3.5

CERTIFICATIONS

- Devsinc Campus Ambassador — Devsinc, 2027 — Promoted Devsinc outreach and student engagement at UMT.
- Social Internship — Alkhidmat Foundation, 2026 — Completed 6 weeks of social work.
- CS50x — Harvard University, 2026 — Completed 10 problem sets and final project.

SKILLS

Languages: C++, Python, JavaScript, TypeScript

Frameworks: React, Node.js, Express, Bootstrap, REST APIs, WordPress

Databases: MySQL, MongoDB, PostgreSQL (Supabase, pgvector)

AI & Cloud: Google Gemini API, RAG, Vector Search, Supabase

Version Control & Environments: Git, GitHub, Docker, Vercel
