SUMMARY

Software Engineering student skilled in Python, C++, JavaScript, SQL, HTML, CSS, OOP, DSA, REST APIs, with hands-on experience in front-end development and database systems. Solved 100+ LeetCode problems with strong problem-solving and software development skills. Seeking an entry-level Software Engineer or Software Developer role.

EXPERIENCE

Front End Developer

Arch Technologies

April 2026 – May 2026, Remote

- Developed front-end features for internal web applications using HTML5, CSS3, and JavaScript.
- Prepared technical documentation and user guides to support project handover and maintenance.

PROJECT

Customer Churn Prediction System

github.com/awaismumtaz1406/customer-churn-prediction-System.git

- Built an end-to-end ML pipeline using a telecom dataset of 7,043 customers to predict churn.
- Performed preprocessing including missing value handling, encoding, and feature normalization.
- Trained Logistic Regression and KNN models using Accuracy, Precision, Recall, F1-Score, and Confusion Matrix evaluation.
- Achieved nearly 80% accuracy and identified churn indicators including tenure, contract type, and monthly charges.

Fitness Coaching Application

github.com/awaismumtaz1406/fitness-app.git

- Developed a full-stack desktop fitness application using Python, Tkinter, and MySQL.
- Implemented SHA-256 password hashing, secure authentication, CRUD operations, and persistent storage.
- Designed database schema and built features for workout tracking, calorie monitoring, and diet recommendations.

Weather Dashboard

github.com/awaismumtaz1406/Webprojects.git

- Built a responsive weather dashboard using HTML, CSS, JavaScript, and Weather API integration.
- Displayed real-time weather conditions and interactive location-based weather insights.

Currency Converter Dashboard

github.com/awaismumtaz1406/currency-converter.git

- Created a currency converter using HTML, CSS, JavaScript, and live Currency API integration.
- Enabled accurate real-time multi-currency conversion with responsive UI design.

News Dashboard

github.com/awaismumtaz1406/Webprojects.git

- Developed a responsive news dashboard using HTML, CSS, JavaScript, and News API.
- Implemented category-based news updates with clean UI and user-friendly content presentation.

EDUCATION

Bachelor of Science in Software Engineering

University of Management and Technology • Lahore, Pakistan • 2028 • 3.5

- CGPA: 3.5.

SKILLS

Languages: C++, Java, Python, JavaScript

Web & Frameworks: HTML5, CSS3, Bootstrap, REST APIs, WordPress

Databases: MySQL, MongoDB

Core Concepts: OOP, DSA, Agile, File I/O, Event Handling, Version Control
